

Search

The Safe Loading Pass Scheme database has been designed to be driven by searching. In order to initiate any action in the database the user will first need to search for something.

Click on ' Search ' f	rom the	menu	bar.

Search Types and Criteria						
Search Types and Chiena						
The following describes the different search options and the criteria the user can use to narrow their search						
Inspection Provider						
 Inspection Location ID 						
 Inspection Provider Name 						
o Town						
• Post Code						
Inspection Provider Assessor						
Inspection Provider Assessor ID						
o Name						
• Jaie Loading Pass						
 Sale Loading Pass serial number (in the form XXXXXXX-YY) Batch number (in the form XXXXXXX) 						
 Datch humber (in the form AAAAAA) Vehicle registration or VIN number 						
Stake Holder Organisation						

- o Stakeholder Organisation ID
- o Name
- o Town
- o Post Code

Application Manual - Searching

- User
 - o Email address
 - o Name
 - User Type
- Vehicle
 - o VIN Number
 - o Registration

Note: Search types are restricted by user type, only those the user is authorised to use will be displayed.

Search			
Safe Loading Pass	AA08		Search
Display 2 of 2		Sort by : SLP S/N ascending	▼ Filter by : All ▼
	0000003-01 0000003 Active AA08LFJ	0000003-05 0000003 Active AA08LFK	

Once the user has selected a search type, they can then enter some search criteria in the search box. The search box is an 'omni-search' and will search for matches across all the criteria stated above at the same time and return results accordingly.

The results of the search will be displayed on cards which the user can click on to view further information.

Filtering and Sorting

The user can narrow their search results, either by being more specific in the search box, or by telling the application specifically what to search on. This is done by setting the '**Filter By:**'

By default, **Filter By** is set to all, meaning all search criteria will be considered.

Search				
Safe Loading Pass	•	AA08		Search
Display 2 of 2			Sort by : SLP S/N ascending	Filter by : All
0000003 0000003 Active AA08LFJ)1		0000003-05 0000003 Active AA08LFK	Batch Number Vehicle Id

Choosing a specific attribute from the filter list will narrow the search.

You can also use 'Sort by:' to choose an attribute by which to sort and display your search results.
